## ❖❖ Management Policy

- "Safety management" is Samyoung's life.
- "Quality Control" is Samyoung's technique.
- "Targets performance management" is Samyoung's asset.

Founded in 1994, Samyoung Corporation is a leader in the electrical construction field, which is the driving force of economic development, including power generation, transmission and transformation of electric power, industrial plants, and petrochemicals. We are also playing a leading role in the renewable energy industry sector such as high-tech, secondary batteries for electric vehicles, solar power generation, and wind power generation, and is expanding its scope not only to domestic but also to overseas projects.

We are practicing responsible management as a specialized technology company that is expanding into the global EPC field by securing a systematic construction system and core technology through the process of manualizing and specializing our work.

In addition, we fulfil our social responsibilities for the environment and safety through ESG management, and strengthen social contributions and win-win cooperation to quickly respond to customer needs in close collaboration with domestic and global partners.

Based on our 30 years of business experience, we will take a second leap forward as a global EPC company and strive to become a leading company with the utmost passion and innovation with all our employees and do our best to become a trustworthy company.

Thank you.
